Abstract of JP63185917

PURPOSE:To obtain a trichogenous solution giving nutrient to the scalp and hair root and reactivating the scalp, etc., by homogeneously mixing powder of raw black sesame and powder of water-oat in water, boiling the suspension and cooling the product. **CONSTITUTION:**1g of powder of raw black sesame and 1g of powder of water- oat are homogeneously mixed together in 180ml of water, boiled and then cooled to obtain the objective trichogenous solution. When the solution is directly applied to the scalp, the component is impregnated into the scalp and hair root to soften aged hard skin, form pores of the skin and generate downy hairs, which are turned into hard hairs. The number of hairs gradually increases according the application of the solution.
